

Access While on Campus

If you need wireless network access, there are two options:

- If you are from an institution that uses eduroam and have an eduroam account, please select the eduroam secure wireless network on your device. You should automatically connect via your home institution's credentials.
- If you do not have an eduroam account, please select the Denison-Guest network on your device and open a web browser. You will be directed to a registration page. Once you enter your email address, you will have Internet connectivity for 48 hours before you are prompted to register again.
